# NICHOLSON **Superior** —THEIR PERFECT TEETH ME

● Special machinery, designed and built exclusively by Nicholson, mills in the teeth of our curved tooth files with an accuracy, uniformity and sharpness never achieved before. Every tooth is perfect—every tooth is identical—scientifically cut to give maximum speed and smoothest finish.

● When you need Curved Tooth Files, specify Nicholson Superior and look for the name Nicholson Superior on the shoulder or edge of each file. That's the way to identify the top quality milled curved tooth files in the market today. Complete catalog sheet from your distributor, or sent from us on request.

● Nicholson Curved Tooth Files include Flexible and Rigid Type in shapes, cuts and lengths to meet all requirements.

**1 FLAT FLEXIBLE**

**2 FLAT (Rigid)**

**3 HALF ROUND (Rigid)**

**4 SQUARE (Rigid)**
